

WHAT IS CLAIMED IS:

1. A roaster oven comprising:
an oven body having its left and right side respectively provided
with a side plate, said oven body having its front and rear side respectively
provided with a covering plate, each said side plate provided with at least
one vertical groove, said vertical groove having one side bored with plural
continual engage notches;
plural position members respectively connecting said side plate
with said covering plate together;
10 plural spits fitted across said two side plates of said oven body;
and,
at least one motor assembled with one end of said spit;
in using said roaster oven said spit pricking food together and fitted
across said two side plates, said motor started to actuate said spit to
rotate, said motor able to control time needed for roasting, said covering
15 plates erected up to concentrate heat source so as to save time and fuel
of roasting, said side plates and said covering plates erected up to prevent
car exhaust, ashes, flies or floating impurities from sticking to food being
roasted when carrying out roasting outdoors.
- 20 2. A roaster oven comprising:
an oven body having its left and right side respectively provided
with a side plate, said oven body having its front and rear side respectively
provided with a covering plate, each said side plate provided with at least
one vertical groove, said vertical groove having one side bored with plural
25 continual engage notches, said oven body bored with an elongate hole in
a lower portion of a front side;
plural position members respectively connecting said side plate

and said covering plate together;

plural spits fitted across said two side plates of said oven body;

at least one motor assembled with one end of said spit; and,

a net base received in said accommodating space of said oven

5 body;

said motor started to actuate said spit to rotate and carry out roasting automatically, said net frame able to be pulled outward for placing charcoal thereon and pushed in said oven body, convenient to start a fire or add charcoal or put out the fire for cleaning out charcoal ashes and

10 safe in use.

3. The roaster oven as claimed in Claim 2, wherein two support members have their opposite ends respectively hooking and supporting the ends of said side plates and said covering plates to horizontally position said covering plates for placing articles thereon.

15 4. The roaster oven as claimed in Claim 2, wherein at least one net frame is fitted across said two side plates, having opposite outer sides respectively provided with a lifting handle.

5. The roaster oven as claimed in Claim 2, wherein said net base is provided with a handle on its outer side.
